TECHNICAL SKILLS

- Programming Languages: Go, Rust, JavaScript, Python, C, C++, Java
- Other technologies: Git & Github, PostgreSQL, MongoDB, Node.JS, Docker, Jenkins, Jira, React, Redux, gRPC, REST, Service Workers, IndexedDB, WebAssembly

EXPERIENCE

University of British Columbia

Vancouver, BC

Computer Science Teaching Assistant

July 2019 – Current

- Holding and supervising labs and office hours for CPSC 213 (Introduction to Computer Systems)
- Teaching students about the basics of Systems Programming, C, Assembly and the fundamentals of Asynchronous, Concurrent and Parallel programming

SAP

Vancouver, BC

Software Developer Intern

Sept 2018 - May 2019

- Worked directly on the SAP Analytics Cloud improving the dashboards and writing new features
- Capitalized on modern browser technologies like Service Workers, Worker Threads and IndexedDB with JavaScript ES6 to hit the application's yearly performance goal of improving the load time by five times
- Wrote and unit tested a widget using React, Redux and TypeScript that is currently adopted as a standard for implementing other widgets across the product
- Represented over 180 interns at SAP as an Intern Committee member, planning social events

PROJECTS

Tic-Tac-Rust

June 2019 - Current

- Built and unit tested Tic-Tac-Toe game manager using the Rust Programming Language
- Compiled the game manager as WebAssembly, published it to NPM and then used it on my own personal website's homepage as a fully functional Tic-Tac-Toe game
- Technologies Used: Rust, WebAssembly, NPM, JavaScript ES6

GoChat

June 2019 – August 2019

- Built a fully functional chat application that utilized gRPC and Protocol Buffers to communicate between different users using bidirectional streaming
- Containerized the application and deployed it as my own private contact me application
- Technologies Used: Go, gRPC, Docker

Interv-You (Academic)

May 2019 – June 2019

- Built a full stack application that helps interviewers and applicants schedule interviews
- Technologies Used: Go, PostgreSQL, JavaScript ES6, Next.JS, React

Elo-Pool

Nov 2018

- Built a application that maintains an ELO based ranking for Pool and Ping Pong at SAP and used Slack's API to declare wins and losses
- Used Slack's API in order to declare wins and losses over the intern's public slack channels
- Technologies Used: JavaScript ES6, Node.JS, Express.JS, MongoDB, REST APIs

EDUCATION

University of British Columbia

Vancouver, BC

Combined Major in Computer Science and Business, Average: 86%

Graduation: April 2021

- Relevant Courses: Basic Algorithms and Data Structures (C++), Introduction to Computer Systems (C), Software Construction (Java), Introduction to Database Management Systems (Used Go and PostgreSQL for the course project)

ADDITIONAL

- Hackathons: EduHacks, nwHacks, Vancouver Startup Week Hackathon
- Interests: Soccer, Computer Ethics, History
